

Paige™

Care happens during visits.
Life happens in-between.

Cleverly disguised as a familiar dementia clock, Paige™ is a secure video solution designed for effortless connection. By removing all technical barriers, Paige strengthens family bonds and reduces isolation for seniors who struggle with traditional devices.

Bridging the 22-Hour Gap

Confidence shouldn't feel out of reach when the caregiver leaves. Even with extra visits, the vast majority of the day remains unknown for families, driving persistent anxiety and burnout.

- **Closing the Gap:** Fill the hours outside of scheduled visits with continuous reassurance, replacing family uncertainty with a reliable window into the home.
- **Designed for Seniors:** Built for technology-averse clients. No menus or passwords; just an always-available connection for families and their loved ones.
- **Dignity Over Surveillance:** Prioritize presence over intrusive monitoring, allowing the circle-of-care to stay aligned and share the emotional load from anywhere.

The Connected Care Advantage

Differentiate your agency by extending connection and presence beyond the shift. In a crowded family-pay market, Paige transforms your agency from an hourly vendor into a trusted care partner.

- **Expanded Services:** Launch virtual wellness check-ins and medication reminders that complement in-person visits. Identify changes in routine, cognition, or health, before it's a crisis.
- **Operational Efficiency:** Drastically reduce unbillable reassurance calls and family friction, freeing staff to focus on high-quality care delivery.
- **Revenue Stickiness:** Ongoing engagement keeps your brand present 24/7, increasing client lifetime value and driving family referrals.

Privacy First, Enterprise Ready.

One platform that streamlines communications for the entire circle-of-care, built to help simplify one of the hardest parts of aging-at-home – staying connected.

- **Paige Frame** – enables frictionless video calls for high-need and digitally excluded populations.
- **Paige Connect** – a secure, invite-only companion app that allows family members and frontline staff to manage contacts, device settings, and make or receive video calls.
- **Paige Cloud** – a centralized desktop console for care professionals to manage device deployment, monitor engagement, and initiate video calls. Supports EMR, scheduling, and billing integrations.

The Infrastructure of Presence

Paige is an in-home hub built for future innovation. Our architecture supports remote monitoring, AI-powered cognitive and wellness insights, and an expanding partner ecosystem, allowing you to scale quality care and capture new revenue streams.

AI-Powered Cognitive Insights

“Since Jim began requiring more care and can no longer travel, it has been difficult for his out-of-town siblings to coordinate visits. Seeing his happiness when he actually sees us on the screen is incredible. It has completely changed how we stay connected. Thank you for inventing this.”

– Pat M & Family
